PROFILE SUMMARY

As a IT Analyst at Tata Consultancy Services (TCS), I have over three years of experience in designing, developing, and deploying consumer and enterprise applications for Android platforms. I have a strong understanding and implementation knowledge of Android native libraries and services, as well as React Native app development. I am proficient in using Android Jetpack, Kotlin Coroutines, and Dagger software tools, and have created a chat application app using Android Jetpack Compose and Firebase, which is available for download from the link. I am currently adding new features to this app, and I am always eager to learn new technologies and frameworks to enhance my skills and deliver quality products. I hold a Bachelor of Technology degree in Electrical and Electronics Engineering from Guru Gobind Singh Indraprastha University (GGSIPU), and have received multiple awards and certificates from TCS for my service and commitment, continuous feedback, and teaching abilities.

PROJECTS

Votter Helpline App Android, 12 Months

Taking forward its continuous efforts of building an active democratic citizenry in the country, the Election Commission of India has undertaken a new initiative by designing a Mobile Application for developing a culture of avid electoral engagement and making informed and ethical ballot decisions among citizens of the country. The app aims to provide a single point of service and information delivery to voters across the country. The app provides the following facilities to Indian voters:

- Electoral Search (#GoVerify your name in the electoral roll)
- Submission of online forms for New Voter Registration, Shifting to a different constituency, Overseas Voters, Deletion or Objection in the electoral roll, Correction of entries & Transposition within the Assembly.

C. Register Complaints related to Electoral Services and track its disposal status

D. FAQ on Voter, Elections, EVM, & Results

E. Service & Resources for Voters & Electoral Officers
